

Help Keep California Waterways Clean!

USE CARE WHEN FUELING YOUR BOAT

- Shut off motors and electrical equipment before fueling.
- Don't rely on the automatic shut-off nozzle to prevent spills; they don't shut off in time.
- Know the capacity of your tank and leave it at least 10% empty because fuel expands. Fill tanks slowly to prevent overflows from the air vent. Avoid "topping off" the tank.
- Hold an absorbent sheet under the nozzle to catch drips, and properly dispose of fuel-soaked absorbents as hazardous waste. Call **1-800-CLEANUP** or visit www.earth911.org to find hazardous waste disposal locations near you. Check your marine supply shop for other spill prevention devices. Applying soap to remove a fuel sheen is **illegal** and bad for the environment.

**Report all spills of oil or chemicals to
(800) 424-8802, (800) OILS911, and to the marina office.**
