California Boating and Waterways Commission Meeting

Virtual Meeting | Nov. 19, 2020 at 9 a.m.

Please join us for the upcoming virtual California Boating and Waterways Commission meeting. As the state continues to mitigate the spread of COVID-19 and respond to wildfire impacts, it is important for the public to learn how the Division of Boating and Waterways (DBW) continues to promote safe and responsible access to California's waterways. Working with constituents is key to implementing successful programs that will benefit California's recreational community.

At the November meeting, the Commission will be informed on the proposed grant for the Pine Flat Lake Boat Launch Facility. DBW staff will also be providing updates on the Private Small Craft Harbor Loan and Shoreline Erosion and Restoration programs, and the following local assistance programs:

- Boat Launching Facilities
- Floating Restrooms
- Public Small Craft Harbor Loans
- Pumpout Facilities

DBW looks forward to your virtual participation. For further information, please visit www.parks.ca.gov/commissions and select California Boating and Waterways Commission to discover details as they are announced.
